TABLE OF CONTENTS

1 Introduction to Project Management ........................................... 1
  1.1 Project Management Body of Knowledge ..................................... 2
    1.1.1 Exercise 1. Definition of Project Management ..................... 5
    1.1.2 Exercise 2. Different types of Projects .......................... 7
    1.1.3 Exercise 3. Information Technology Project Management .......... 7
    1.1.4 Exercise 4. Interactive Media, Network, Software, Database Projects .... 8
  1.2 Self-Review Questions .................................................. 10

2 Introduction to Organizations and Project Manager ......................... 12
  2.1 Project Manager .................................................................. 13
    2.1.1 Exercise 1. Characteristics of a Project Manager ............. 13
    2.1.2 Exercise 2. Selecting a Project Manager .......................... 14
  2.2 Organization structures ...................................................... 14
    2.2.1 Exercise 1. Organization Structures for IT Projects .......... 15
    2.2.2 Exercise 2. Your Group Organization Structure ............... 16
  2.3 Self-Review Questions .................................................. 18

3 Introduction to Microsoft Project ............................................. 20
  3.1 Hands- On Exercises / Step by Step ....................................... 21
    3.1.1 To Start Microsoft Project 2003 .................................... 21
    3.1.2 To Use Project Guide ............................................... 22
    3.1.3 To Use Help Menu .................................................. 22
    3.1.4 To Customize Standard Toolbar .................................... 23
    3.1.5 To Use Filters ...................................................... 24
    3.1.6 To Exit Project 2003 ............................................... 24

4 Introduction to Scope Management ............................................ 25
  4.1 Hands- On Exercises / Step by Step ....................................... 26
    4.1.1 To Create a New Project File ..................................... 26
    4.1.2 To Develop Work Breakdown Structure ............................ 27
    4.1.3 Saving Project Files With or Without a Baseline ............. 29
  4.2 Self-Review Questions .................................................. 30

5 Introduction to Time Management ............................................ 32
  5.1 Hands- On Exercises / Step by Step ....................................... 33
    5.1.1 To Enter Task Durations ............................................ 33
    5.1.2 To Establish Task Dependencies .................................... 35
    5.1.3 To Change Task Dependency Types and Adding Lead or Lag Time ... 37
    5.1.4 To View a Project with Gantt Chart ................................ 38
    5.1.5 To View a Project with Network Diagrams ....................... 38
    5.1.6 To Do the Critical Path Analysis .................................. 39
  5.2 Self-Review Questions .................................................. 41

6 Introduction to Cost Management ............................................ 42
  6.1 Hands- On Exercises / Step by Step ....................................... 43
    6.1.1 Fixed and Variable Cost Estimation ................................ 43
9 Calculations in Spreadsheet ................................................................. 79
  9.1 Step-by-step Exercise ........................................................................ 80
    9.1.1 Exercise 1. Creating a Simple Formula ................................. 80
    9.1.2 Exercise 2. Using Cell Referencing ....................................... 80
    9.1.3 Exercise 3. Using the Mouse for Cell Referencing ............... 80
    9.1.4 Exercise 4. Editing a Formula ................................................ 81
    9.1.5 Exercise 5. Use of Brackets ...................................................... 81
    9.1.6 Exercise 6. Adding Several Numbers Together ....................... 82
    9.1.7 Exercise 7. Sum Function ...................................................... 83
    9.1.8 Exercise 8. Using the AutoSum Tool ....................................... 84
    9.1.9 Exercise 9. Using Functions in a Table .................................. 85
    9.1.10 Exercise 10. Using an IF Function .......................................... 87
  9.2 Absolute Cell Referencing ............................................................... 88
  9.3 Lookup Functions ............................................................................. 91
    9.3.1 Exercise 11. Vertical Lookup ............................................... 91

10 Introduction to Formatting in Spreadsheet ......................................... 93
  10.1 Step-by-step Exercise ..................................................................... 94
    10.1.1 Exercise 1. Using AutoFormat on a Table ......................... 94
  10.2 Formatting Using Shortcuts ............................................................ 95
    10.2.1 Exercise 2. Formatting Text in Individual Cells .................... 96
    10.2.2 Exercise 3. Basic Number Formatting ................................. 98
  10.3 Column Widths and Row Heights .................................................. 99
    10.3.1 Exercise 4. Adjusting Height And Width ............................ 99
  10.4 Advanced Formatting Options ...................................................... 101
  10.5 Number Formats ........................................................................... 101
    10.5.1 Exercise 5. Changing Number Formats ................................ 102
    10.5.2 Exercise 6. Changing Date Formats ...................................... 103
  10.6 Text Formats ................................................................................ 103
    10.6.1 Exercise 7. Aligning Text ..................................................... 103
    10.6.2 Exercise 8. Font Options ...................................................... 104
  10.7 Borders and Shading ..................................................................... 104
    10.7.1 Exercise 9. Format Borders Using the Cell Format Options ... 105
    10.7.2 Exercise 10. Drawing Borders .............................................. 105
    10.7.3 Exercise 11. Editing Border Patterns .................................... 107
    10.7.4 Exercise 12. Removing Formatting ...................................... 108

Software Project Management (BITP 3223)

PREFACE

Overview

Project Management has been an established field for many years. Managing IT project management in general and network/software/interactive media project management in specific requires ideas and information that go beyond standard project management. Effective project management ensures that a project is completed on time, within budget and with high quality. This lab module is designed to equipped student with hands-on experience on implementing their project management body knowledge and to make these techniques more obvious and expose student to a variety of techniques to manage the budget, schedule and quality of projects that student are responsible for.

Approach

The objectives of this module is to introduce student with software for project management using the top project management software tool in the industry namely Microsoft Project. This software will help student in understanding and applying the project management knowledge areas and processes. We will also use other tools such as spreadsheet software, which is Microsoft Excel and Internet Browsers. Each lab offers student many opportunities to get hands-on and build new software skills.

Upon completion of this lab module the students should have:

- Substantial skills to use software for managing IT project management in general and network project management in particular.

Chapter Layout

Each chapter begins with a list of objectives. These include the important concepts to be mastered within the chapter.

Extensive self-review questions are included at the end of each chapter for self-study. They provide the student with a chance to build confidence with the lab exercises. This module contains 12 chapters, which can be divided into 4 sections.
