THE TAPESTRY OF KNOWLEDGE: MANUFACTURING ENGINEERING RESEARCH

The third volume of The Tapestry of Knowledge: Manufacturing Engineering Research presents recent research findings focusing on the field of manufacturing engineering, with broad coverage of topics related to manufacturing systems, engineering materials, manufacturing processes, and manufacturing automation. This book emphasizes advancements that bridge the theoretical framework with practical applications. It highlights various examples and real applications of advanced tools and techniques in implementing engineering solutions. This book serves as a platform for academic exchange among experts, scholars, researchers, and students to advance the state of the art and benefit society.

Kok-Tee Lau obtained his PhD in Materials Science and Engineering from the University of New South Wales, Australia, in 2012. He is currently an Associate Professor in the Faculty of Industrial and Manufacturing Technology and Engineering at Universiti Teknikal Malaysia Melaka. His recent research focuses on the development of functional coating materials. He has authored over 70 papers in international journals and conference proceedings in the areas of electrophoretic deposition/electrodeposition processes, functional polymeric composite materials, metal interconnections for semiconductor packages/circuit boards, and high-temperature superconductor bulks/tapes.
