EMERGING TRENDS IN TECHNOLOGY BUSINESS AND EDUCATION

Emerging Trends in Technology, Business and Education is a forward-looking collection of research and insights exploring the dynamic intersection of digital innovation, societal change, and educational transformation. Featuring studies presented at CoNeSciNTech 2024, the book covers a wide range of topics—from the usability of network learning tools and the psychology of fear in gaming, to the role of AI in halal meat certification, women's evolving influence in Malaysian business, and the development of smart school systems. This volume offers valuable perspectives for educators, researchers, and professionals seeking to understand and adapt to the rapidly shifting digital landscape.
